

SAFELY MADE IN THE USA. 

COVID-19 VACCINATION SIGNAGE

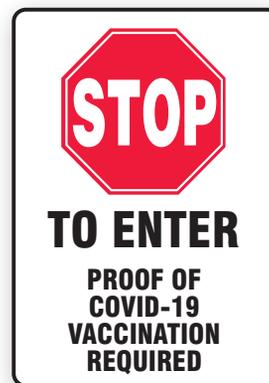

SAFETY PRACTICES PLAY A VITAL ROLE

The COVID-19 general vaccination process is underway with clinic location set-ups as satellite, temporary, off-site, and on-site medical facilities. Proper vaccine administration is critical to ensure that vaccination is safe and effective. Storage, handling, and health and safety practices all play a vital role in protecting individuals and workers that are administering and receiving the vaccine.

To protect the health and safety of others it is essential to set out safety, informational, and guidance identification products for vaccination locations. Regardless of the vaccine administer, be it small or large clinic set-ups, the CDC has specific guidelines and procedures for workplaces, community centers, schools, churches, pharmacies, care facilities, hospitals, stadiums, arenas, to drive-through facilities – all of which include signage.

Signs provide messages and information in vaccination clinic areas for procedures, safety, healthcare workers' protection, and directions to those waiting for and receiving the vaccine shot. Planning for these vaccination clinic locations require COVID-19 pandemic protocol considerations, including physical/social distancing, personnel protective equipment (PPE), face masks, and enhanced sanitation with infection control guidance.

- Post and set out signs in highly visible locations – such as entry, areas, and exit
- Wall signs and floor signs are to mark specific areas and points clearly
- Use signs to remind and enforce the importance of social distancing, wearing face masks, proper handwashing or sanitizing, and identifying vaccine storage protocols
- Use barriers and barricades to identify queues or section off areas for workers and patients to provide additional protection

Be ready to identify set-up locations, whether for one day or over multiple days with any of these vaccine and vaccination identification signage.

Materials

A comprehensive selection of materials designed to meet virtually every application and environmental demand from the parking lot to aisle ways, we've got you covered.

Signs

Adhesive Vinyl – Ideal for indoor and sheltered outdoor marking needs. Flexible vinyl with a printed matte surface. Permanent acrylic adhesive back with peel-off liner.

Plastic – Durable for indoor and sheltered outdoor use. The print has a clear UV Duck Armor™ Liquid Laminate protective overcoat. 50% of recycled plastic content has UV inhibitors and impact resistance. Rounded corners with mounting holes.

Aluminum – Ideal for tough indoor and harsh outdoor locations. Rigid aluminum provides metal strength without rust. The print has a clear UV Duck Armor™ Liquid Laminate protective overcoat. Withstands washdown, abrasion, and chemical splash—rounded corners with mounting holes.

Reflective Aluminum – Engineer-grade prismatic reflective thick aluminum provides added visibility in lowlight conditions. The print has a clear UV Duck Armor™ Liquid Laminate protective overcoat. Rounded corners with center post-mount holes. Durable for outdoor location.

Labels

Adhesive Vinyl – Flexible vinyl with the printed surface. Mount with permanent acrylic adhesive back with peel-off liner—ideal for indoor and protected outdoor placement.

Adhesive Dura-Vinyl™ – Flexible vinyl with a clear UV Duck Armor™ Liquid Laminate protective overcoat. Mount with permanent acrylic adhesive back with peel-off liner. Durable for indoor and outdoor placement.

Magnetic Vinyl – Flexible magnetic vinyl can place, lift, and replace on most steel or ferrous metal. The print has a clear overlaminate to resist chipping and cracking.

Floor Marking

Slip-Gard™ Floor Sign – Made of dual-layer tough construction. The underlayer is adhesive vinyl, and the

sign is subsurface print. Non-slip, pebble-textured has an over-laminate top surface to provide added durability, protecting the graphics and message from heavy pedestrian traffic. Strong, permanent acrylic adhesive underside has a peel-off liner and adheres firmly to smooth, clean, dry surfaces.

Floor Signs

Fold-Ups® – High-impact plastic panels stand upright with bold message and symbol on both sides. Quick, easy set-up, transport with cut-out top handle, and folds flat for storage.

Reversible Fold-Ups® – Versatile – two signs in one. Lightweight, waterproof corrugated plastic 20"H x 12"W panels. Flip and fold sign inside-out to 'reverse' reveal the other message. Transport with cut-out top handles and unfolds flat for storage.

Brace-Bow™ Stand-Up – 3-ft H x 2-ft W high-impact, thick and sturdy plastic panels adhere together at the top, and easy to set bottom part of panels 14" apart with hook & loop base attachment. Remove base to close panels flat for transport and storage.

Tapes

Barricade Tapes – Unspool off the length of tape with bold warning message is continuously repeated the length of the roll. Lightweight, thin polyethylene plastic non-adhesive tape is durable for indoor and outdoor environments. Easily cut and secure with adhesive tape, nail, staples, or tie-off.

Floor Tapes – 6-mil vinyl tape with adhesive back, self-wound on rolls. Unroll to apply to clean, smooth, dry surface.

Post Barriers

2" woven polyester tape is wound in self-tension spring-loaded unit. Retracts smoothly and safely into the head unit for storage. The post is 2 1/2" diameter x 38"H with a 14" diameter weighted base.

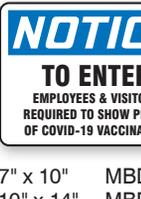

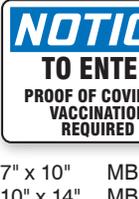

Safety Signs

Signs convey and remind of safety protocols in place. Post and install at entry points, on or inapplicable areas within and throughout the facility. Communicate health and safety policies, reinforce procedures, and identify locations. Choose from flexible adhesive to durable, rigid style materials.

To order, add material code after part number. More sign materials are available at Accuform.com.
